

Remove Barcode Suffix

The [Media Option](#) Remove Barcode Suffix removes the scanned Barcode's matching suffix, up to a maximum of three characters.

Options

[String pattern](#), up to 3 characters long, to match against and remove from the scanned Barcodes.

Examples

With a [String pattern](#) of L6 will remove the suffix from Barcode 100234L6, to scan as 100234.

With a [String pattern](#) of L* will remove the suffix from Barcode 100234L4, 100234L6, or any Barcode ending in L? (where ? is a wild card to match one character)
