

Highwater Offset

The [Repository](#) Option [Highwater Offset](#) lowers the [Slot](#) allocation below the total number of [Slots](#) currently allocated to this [Repository](#).

For example if the total allocation of [Slots](#) to this [Repository](#) is 500, setting the [Highwater Offset](#) to 100 will stop [TMSS10SlotAllocation](#) assigning any Volumes above [Slot](#) 400 (ie 500 total [Slots](#) - 100 [Highwater Offset Slots](#) = 400 assignable [Slots](#) (1 to 400)).

Highwater Offset Options

Number of [Slots](#) to make un-assignable.
