

Repository Option: Highwater Offset

The [Repository](#) Option Highwater Offset lowers the Slot allocation below the total number of Slots currently allocated to this Repository.

For example if the total allocation of Slots to this Repository is 500, setting the Highwater Offset to 100 will stop TMS10SlotAllocation assigning any Volumes above Slot 400 (ie 500 total Slots - 100 Highwater Offset = 400 available Slots (1 to 400)).

Highwater Offset Options

Number of Slots to remove
