

# TapeTrack Extensions

TapeTrack has several extensions to make tape management more efficient and user friendly.

## Slack App

The TapeTrack Slack App allows you to query tape libraries and move tapes from one location to another, all from within [Slack](#).

Full details on the [TapeTrack Slack App](#) can be viewed [here](#)

## GazillaByte Cloud Scan

The TapeTrack CloudScan API (TCS) allows a scanning device to communicate with a 2nd device via HTTP/HTTPS.

This enables a mobile device, such as an iOS or Android phone to act as a barcode scanner that can be connected to a desktop PC.

A QR code, generated by the scan window within TapeTrack Desktop Software, is scanned by your mobile device to establish a secure connection with the Web Service. Barcodes can then be scanned and sent through to the linked TapeTrack Desktop Software.
