TapeTrack Extensions

TapeTrack has several extensions to make tape management more efficient and user friendly.

Slack App

The TapeTrack Slack App allows you to query tape libraries and move tapes from one location to another, all from within Slack.

Full details on the TapeTrack Slack App can be viewed here

GazillaByte Cloud Scan

The TapeTrack CloudScan API (TCS) allows a scanning device to communicate with a 2nd device via HTTP/HTTPS.

This enables a mobile device, such as an iOS or Android phone to act as a barcode scanner that can be connected to a desktop PC.

A QR code, generated by the scan window within TapeTrack Desktop Software, is scanned by your mobile device to establish a secure connection with the Web Service. Barcodes can then be scanned and sent through to the linked TapeTrack Desktop Software.
