2025/12/01 16:23 1/1 Printing Slot Barcodes

## **Printing Slot Barcodes**

Currently there is no provision to print slot barcodes directly from TapeMaster. However, as slots are simply allocated a numerical sequence 000000, 000001, 000002 etc.

A text file with slot numbers (slot ID:Text) and text identifier (alphanumeric barcode representation) can be imported into the Barcode printer from the menu File→Open.

To create large groups of slotID:description fields for importation it is recommended to use Excel auto fill feature.
