Printing Unqualified Barcode Labels

Printing Unqualified Barcodes with TapeTrack Barcode Printer is accomplished by loading the Barcodes via a text file.

Creating The Barcode Text File

Information in the text file has the format of barcode; Human_readable_barcode, one barcode per line.

The Barcode Text File can be created several different ways, which method is best used depends on the quantity of Barcode labels required.

If only a couple of labels are required, the easiest method is to use a text editor like Notepad to manually type the labels required.

If a large number of Barcode Labels using Excel to create the required values for the text file.

- Selecting the Volumes in TapeMaster and copying values to your clipboard by right clicking the highlighted Volumes and selecting Edit → Copy → Unqualified Volumes.
- Open Excel and paste Volume-ID's into an Excel spreadsheet column A
- Add ; to column B and drag cell to auto fill the cells next to column A values
- Use cell formulas to concatenate the cell values to one column using formula =CONCAT(A1,B1,A1) to create the barcode;barcode format.
- Copy the concatenated column and paste into a Notepad file, saving under a known name and location.

Editing Print Layout

Last update: 2025/01/21 22:07

Use the left window pane on the Barcode Printer to edit the print layout options to suit your requirements.

- Across: Number of barcodes to print across the page.
- Down: The number of barcodes to print down the page.
- Margins: Margins to be placed around the barcodes
 - Left: Left margin padding
 - Right: Right margin padding
 - Top: Top margin padding
 - Bottom: Bottom margin padding
- Appearance:
 - Separator Box: Adds a grey border around each Barcode to aid in separating individual Barcodes when manually cutting them out.
 - Preview Margins: Adds a preview of print boundaries to aid in confirming Barcode will

print within a specified area.

- $\circ\,$ QR $\,$ Code: Adds a QR code to the Barcode label.
- \circ Include Human Readable: Adds text representation of Barcode to make it readable by Humans.
- $\circ\,$ Font: Sets font for Human Readable content, does not alter Barcode.

Preview Print Layout

From the Main Menu, select File \rightarrow Print Preview
