# **TapeTrack Reconciliation Report**

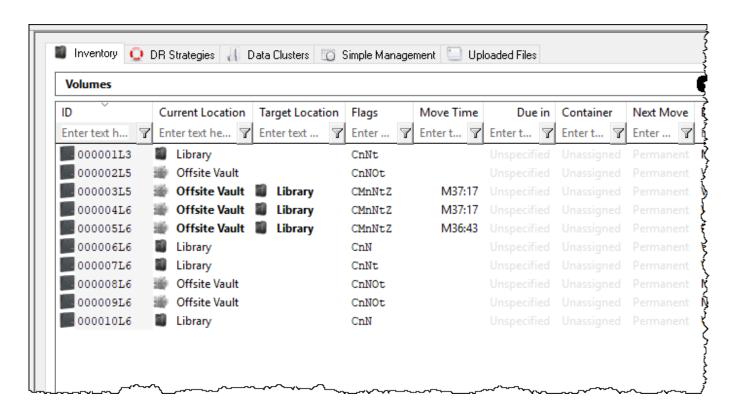

The TapeTrack Reconciliation Report is created by the Command Line Program TMSS10Reconcile.

The program runs in 4 sequential phases:

- Phase 1 Load of the TapeTrack Scan-Map from a Scan File.
- Phase 2 Reconciliation of the Scan-Map.
- Phase 3 Listing of unreferenced Scan-Map items.
- Phase 4 Report Production.

## Report Input

#### **TapeTrack Customer Status**

#### Scan File

# **Report Sections**

#### **Load of Scan-Map**

The purpose of this phase is load a TapeTrack Scan-File and resolved each of the a Scan-File Entries into a Fully Qualified TapeTrack Barcode.

As the Scan-File is loaded, a Scan-Map is created.

Alternatively, rather than loading the Scan-Map from a Scan-File, the TapeTrack Import Engine can be used to load the Scan-Map. This facilitates loading from Fixed Length Reports, CSV Files and ODBC Data Sources.

The Fully Qualified TapeTrack Barcode can be resolved from an Unqualified Barcode or an Extended Attribute.

### **Reconcile of TapeTrack Volumes**

The purpose of this phase is to list all of the Volumes that are either in, moving to, or unexpected in the specified Repository.

The following statuses may result:

- **Reconciled** if the Volume is in the target repository, is in the Scan-Map and not moving.
- **Reconciled (Confirmed)** if the Volume is moving into the specified Repository and is in the scan map. The Volume will be Confirmed in the TapeTrack database.
- **Absent from Scan-Map** if the Volume is confirmed into the specified Repository and is not present in the Scan-Map. An Audit Flag will be placed on the Volume.
- **Pending Confirmation** if the Volume is in a Move Status out from the specified repository and is not overdue at the target repository.
- **Overdue at Target** if the Volume is in a Move Status to the specified Repository, is not in the Scan-Map and is now overdue at the target repository.
- **Unexpected in Scan-Map** Present in Scan-Map but not present at, or moving to, the target repository.

Report headings and spacing have been edited to fit information on web formatting

System: TapeTrack Report Description: Phase 2: Reconcile TapeTrack Volumes against Scan-Map Report Notes: Repository OFFS Production Time: Monday, March 19, 2018 - 10:21:34 (AUS Eastern Daylight Time) Report Width: 169 bytes				
Seq Barcode Current Rep Target Rep Move Time Scanned Status Notes	0verdue	:		
1 US04.LT0.000002L5 Offsite Vault	No	Yes		
OK Reconciled 2 US04.LTO.000003L5 Offsite Vault Library H1:10:39	No	Yes		
OK Pending confirmation 3 US04.LT0.000004L6 Offsite Vault Library H1:10:39 OK Pending confirmation	No	Yes		

4	US04.LT0.000005L6	Offsite Vault	Library	H1:10:05	No	Yes
0K	Pending confir	mation				
5	US04.LT0.000008L6	Offsite Vault			No	No
NOT	-OK Absent from Sc	an-Map				
6	US04.LT0.000009L6	Offsite Vault			No	Yes
0K	Reconciled					
7	US04.LT0.000010L6	Library			No	Yes
NOT	-OK Unexpected in	Scan-Map				
7	US04.LT0.000010L6				No	Yes

Following the example data at the top of page we have:

- Volumes 000002L5 and 000009L6 are referenced as **Reconciled** as they are in the scan map, and confirmed in the current repository (Offsite Vault).
- Volumes 000003L5, 000004L6 and 000005L6 are referenced as **Pending confirmation** as they are in the scan map, and in a move from the current repository but not yet confirmed at the target repository.
- Volume 000008L6 is referenced as **Absent from Scan-Map** as it appears in TapeTrack as at the current repository but is absent from the scan map. This shows the volume is either somewhere it shouldn't be or is missing and as such is given a status of **NOT-OK** and is given an audit flag for further investigation.
- Volume 000010L6 is referenced as Unexpected in Scan-Map as it is present in the scan map
  as being at the current repository but shown in TapeTrack as being confirmed at another
  repository. As such is given a status of NOT-OK and is given an audit flag for further
  investigation.

## **Unreferenced Scan-Map Entries**

This report shows Volumes that are in the Scan-Map, but are not known to TapeTrack.

Reasons for this error could be:

- Volume does not belong to you but has been included with your volumes by operator error.
- Manually produced scan file with a typo on a volume ID.
- Volume added to inventory but not entered into TapeTrack.

#### **Reconciliation Statistics**

This report shows the final statistics for the Reconciliation process.

System: TapeTrack Report Description: Phase 4: Reconciliation Statistics Production Time: Monday, March 19, 2018 - 10:21:34 (AUS Easte Time) Report Width: 75 bytes	ern Daylight
Metric Cou	ınt
Phase 1: Read from Scan-File	7
Phase 1: Loaded successfully from Scan-File	7
Phase 1: Loaded unsuccessfully from Scan-File	+ 0
Phase 2: Reconciled	2
Phase 2: Reconciled (Confirmed)	0
Phase 2: Confirmation Bypass	0
Phase 2: Pending confirmation	3
Phase 2: Out of scope	3
Phase 2: Absent from Scan-Map	+ 1
Phase 2: Unexpected in Scan-Map	+ 1
Phase 2: Overdue at subject repository	+ 0
Phase 2: Overdue at target repository	+ 0
Phase 3: Unreferenced Scan-Map items	+ 1
Phase 4: Total Errors	3

**Phase 1** Reads in volume ID's from the scan file, parses them (depending on format) into Customer ID, Media ID and volume ID. Metrics are then displayed as the number of volumes successfully and unsuccessfully loaded ready for reconciliation in phase two.

With the example data, all 7 entries were successfully loaded as fully qualified barcodes from the scan file into the scan map ready for reconciliation.

#### Phase 2

**Reconciled** shows number of volumes present in scan map and confirmed at subject repository. **Reconciled (Confirmed)** shows number of volumes confirmed into subject repository that were in a move to there and present in scan map. **Confirmation Bypass** (set as an attribute in TMSS10Reconcile) shows the number of volumes moving to subject repository and present in scan map but not confirmed. **Pending confirmation** shows number of volumes present in scan map, in a move status out of subject repository and yet to be confirmed at target repository. **Out of scope** shows the number of volumes in the customers inventory that are not referenced in the scan map and are listed in TapeTrack as being confirmed in a repository other than the subject repository. **Absent from Scan-Map** show the number of volumes expected to be either in, moving to or moving from the subject repository that are not listed in the scan map. Unexpected in Scan-Map Overdue at subject repository Overdue at target repository
