

# Changing the Database Location

The TapeTrack database location can be changed by specifying the `-h` argument when starting TapeTrack.

It is recommended that the TapeTrack database not be stored on an SMB or NFS share.

## Changing the Database Location On Windows

Open administrative command window and stop the TapeTrack service with the command **net stop TMSS10SVC**.

Open regedit and navigate to **HKEY\_LOCAL\_MACHINE\SYSTEM\ControlSet001\Services\TMSS10SVC**.

Double click on ImagePath to open Edit String window.

Add argument **-h** to end of current string and fully qualified path of db folder.

Click OK and exit out of registry.

In the administrative command window restart the TapeTrack service with the **net start TMSS10SVC**.

Login to TapeMaster to check the database redirection was successful.
