Installing Linux x86

Prerequisites

Redhat based Linux operating system:

- RedHat
- CentOS
- Fedora
- Oracle Linux
- ClearOS

Linux dependency libraries:

- glibc.i68
- zlib.i686
- libstdc++.i686

Download and Install Linux rpm's -TapeTrack Framework Server

The two installation packages required for TapeTrack Server - Linux are:

Client RPM Package

Server RPM Package

Always install the Client RPM package first as the Server RPM package depends on files located within the Client RPM package.

An example installation command is:

Install the Client RPM package.

<sxh> rpm -i http://mirror-us.tapetrack.com/Linux-x86/tapetrack-clients-latest.i386.rpm </sxh>

Install the Server RPM package.

<sxh> rpm -i http://mirror-us.tapetrack.com/Linux-x86/tapetrack-server-latest.i386.rpm </sxh>
