Installing

Windows

The TapeTrack Framework Server Software installs automatically via an InstallShield installer.

Locate the executable you downloaded, setup.exe, and double click to initiate the installation.

Click Next > to start the Install Shield Wizard.

After reading and agreeing to the License Agreement click I accept the terms in the

license agreement and Next > to proceed

image

Confirm the installation directory is correct, or click Change to select another installation directory. Click Next > to proceed.

image

Click Install to begin the installation

image

Click Finish to exit the installer.

At the conclusion of the installation process, the installer will also kick-off an install of the following packages, which can optionally be installed:

- TapeTrack TapeMaster
- 2. TapeTrack Server Utilities

Linux

The TapeTrack Framework Server will be installed by the Redhat Package Manager (RPM).

An example installation command is:

Install the Client package (must be installed before the Server package).

```
rpm -i
http://mirror-us.tapetrack.com/Linux-x86/tapetrack-clients-latest.i386.rpm
```

Install the Server package.

```
rpm -i
http://mirror-us.tapetrack.com/Linux-x86/tapetrack-server-latest.i386.rpm
```
