# Installing

#### **Windows**

The TapeTrack Framework Server Software installs automatically via an InstallShield installer.

Locate the executable you downloaded, setup.exe, and double click to initiate the installation.

Click Next > to start the Install Shield Wizard.

After reading and agreeing to the License Agreement click I accept the terms in the

2025/12/01 06:30 3/4 Installing

#### Click Finish to exit the installer.

At the conclusion of the installation process, the installer will also kick-off an install of the following packages, which can optionally be installed:

- 1. TapeTrack TapeMaster
- 2. TapeTrack Server Utilities

### Last update: 2025/01/21 22:07

#### Linux

The TapeTrack Framework Server will be installed by the Redhat Package Manager (RPM).

An example installation command is:

Install the Client package (must be installed before the Server package).

rpm -i

http://mirror-us.tapetrack.com/Linux-x86/tapetrack-clients-latest.i386.rpm

Install the Server package.

rpm -i

http://mirror-us.tapetrack.com/Linux-x86/tapetrack-server-latest.i386.rpm

## **Download and Install TapeMaster and Server Utilities**

As you are installing TapeTrack on a Linux server, you will also need to download and install TapeMaster and Server Utilities on a Windows machine (with network access to the Linux server) to access and administer the TapeTrack Server.

Download TapeMaster
Download Server Utilities

Install both programs by double clicking the executables and following the installation wizards.

Installing TapeMaster
Install Server Utilities
