2025/12/01 07:41 1/1 Reloading The Database

Reloading the database

You may wish to reload the TapeTrack Database for the following reasons:

- You have loaded a lot of randomly organized data and the database pages have become unbalanced.
- 2. You have deleted a lot of data and the database contains a lot of slack space.
- 3. You have lost the database log files or the database has become inconsistent with the database log files.

Reload procedure

- 1. Notify your users that the TapeTrack System will be unavailable.
- 2. Stop the TapeTrack Service.
- 3. Backup the TapeTrack database files.
- 4. Open a command prompt as Administrator.
- 5. Change directory to the TapeTrack Database file (you can used variable TMSS10DB).
- 6. Run the command TMSS10Server with the -L argument.
- 7. Check the output to ensure each of the steps ended with a zero return code.
- 8. Start the TapeTrack Service.
