# **Decommissioning Server Replication**

## **DB Config File**

On the server that your master Framework Server is installed, navigate in Windows File Explorer to the TapeTrack Installation folder (default = C:\Program Files\TapeTrack\TapeTrack Framework Server\var\db) and open the file DB CONFIF with a text editor such as Notepad.

# **Edit Config File**

Scroll to the bottom of the config file until you see the replication code section

```
rep_set_priority 1
repmgr_site replicant-1.tapetrack.com 5010
repmgr_site master.tapetrack.com 5010 db_local_site on db_group_creator on
```

Add a hash tag to the start of the lines of code to convert them to comments so they will be skipped when TapeTrack loads the config file.

```
#rep_set_priority 1
#repmgr_site replicant-1.tapetrack.com 5010
#repmgr_site master.tapetrack.com 5010 db_local_site on db_group_creator on
```

Save the file, ensuring that it saves as DB\_CONFIG.cfg and not .txt

### **Restart The Server**

### Starting and Stopping the Service

When performing tasks such as server maintenance it may be necessary to manually start and stop the TapeTrack Service.

#### **Windows**

#### **DOS Prompt**

From a DOS prompt started as Administrator you can run the following commands:

```
Microsoft Windows [Version 10.0.17134.523] (c) 2018 Microsoft Corporation. All rights reserved.
```

C:\WINDOWS\system32>net stop tmss10svc

The TapeTrack Media Management Framework Server service is stopping......
The TapeTrack Media Management Framework Server service was stopped successfully.

#### C:\WINDOWS\system32>

Microsoft Windows [Version 10.0.17134.523] (c) 2018 Microsoft Corporation. All rights reserved.

C:\WINDOWS\system32>net start tmss10svc

The TapeTrack Media Management Framework Server service is starting......
The TapeTrack Media Management Framework Server service was started successfully.

C:\WINDOWS\system32>

#### **Windows Service Manager**

#### **TapeTrack Server Helper**

TapeTrack Server Helper can be found in th TapeTrack installation directory, default install location is C:\Program Files\TapeTrack\TapeTrack Framework Server\TMSS10ServerHelper.exe

Run the TapeTrack Server Helper App and click the Start or Stop button in the **Control Service** Section.
