Certificates and Certification

In TapeTrack, a **Certificate** is a digitally-generated form that indicates whether or not a Repository is performing adequately. Repositories can either receive a Certified status or a Refused status. Repositories gaining a Certificate Refused status have Audit Failures due to either surplus Volumes or deficit Volumes.

certificates that have previously been generated can be viewed on the Certificate tab.

- **Time** displays the date and time the certificate was produced.
 - A tick indicates a successful certification.
 - A cross indicates an unsuccessful certification.
- **Signature** displays the certificates unique digital signature.
- **Description** displays the description (if any) of the certificate.
- **Count** displays the deficit count of volumes.

Last update: 2025/01/21 22:07

- **Deficit** displays the deficit count of volumes.
- Surplus displays the surplus count of volumes.
- Status displays certificate's certified or refused status.
