# **Installing Sync**

Linux Framework RPM's have the Sync files built into them. If you have the Framework Server already installed, the Sync files will be installed in the bin directory. Check for /bin/TMSS10Sync to confirm.

Windows will need a separate executable to be installed.

#### **Windows**

The TapeTrack Sync Software installs automatically via an InstallShield installer.

Click setup.exe to start the install.

## AIX, Linux and IBMi

The software is packaged using Redhat Package Manager (RPM). To invoke the installation simply enter the command

rpm -i tapetrack-clients-2013.3.1.rpm

File name shown is an example only. Replace with the file name of your downloaded version.

If you do not have RPM installed on your system a tar archive can be supplied on request.

#### **HP UX**

The software is packaged as a tar archive.

#### **Solaris**

The software is packaged using the Solaris Package Manager. To invoke the installation simply enter the command:

pkgadd -d TapeTrack-Clients.2013.4.SPARC.pkg

File name shown is an example only. Replace with the file name of your downloaded version.

### z/OS

Last update: 2025/01/21 22:07

The software is packaged as a tar archive and can be installed under USS with the following commands:

cd /usr/bin mkdir /usr/bin/tapetrack cd /usr/bin/tapetrack gunzip tapetrack-clients-2013.3-1.s390.tar.gz tar xvf tapetrack-clients-2013.3-1.s390.tar

File name shown is an example only. Replace with the file name of your downloaded version.
