## **Synchronization Prerequisites**

To be able to synchronize you will need the following components and information:

- 1. The TapeTrack Synchronization Suite software fully installed.
- 2. The address and port of your TapeTrack Server.
- 3. The User-ID and password of your TapeTrack Server.
- 4. The TapeTrack Customer-ID and Media-ID for the tapes being synchronized.
- 5. The TapeTrack Repository-IDs for each location that a tape volume may be moved to.
- 6. The ability to extract data from your backup or tape management software using either an ODBC connection or command line interface.
- 7. Access to schedule a task under Windows Task Scheduler or cron(8).
