# **Adding New Volumes In Lite**

Adding new Volumes to TapeTrack using Lite can be achieved using one of two methods depending on the outcome required.

## **Prerequisites**

To add new Volumes you will need to have, at the minimum, read/write/alter access associated with your User-ID.

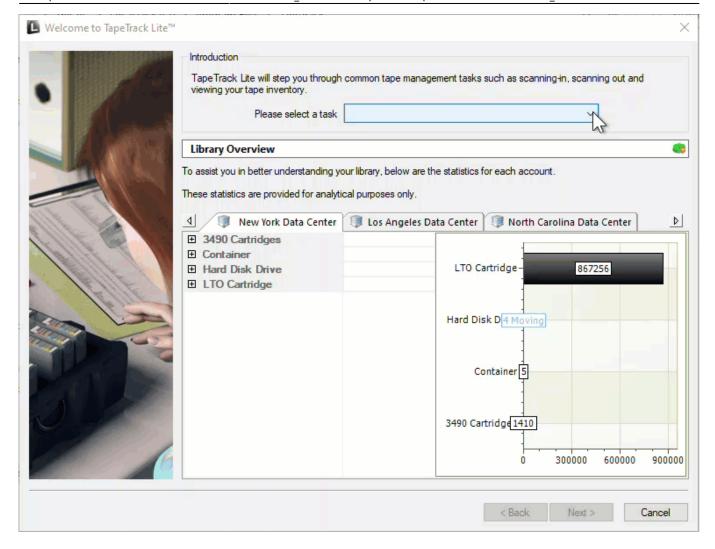

If you don't know if you have alter access rights, continue with the process to add the new Volumes. If you do have alter rights, the Volumes will be added successfully, if you don't you will receive an error stating Security does not allow this operation.

If you find you don't have alter rights, you will need to contact your TapeTrack administrator to either upgrade your access credentials or have them add the new Volumes for you.

If you would like assistance in providing the required information to your TapeTrack administrator (or Vaulting Service) please contact us via the Helpdesk.

# **Adding New Volumes In Lite In Volume Management**

Select Volume Management from the **Task Menu** and click Next to continue.

## **Options**

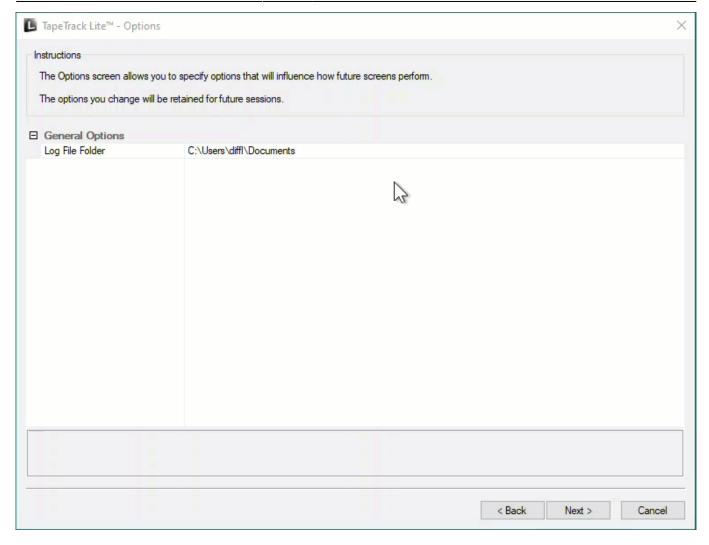

This will open the **Options** window. If required you can set the location for the log files to be written to by, or leave the default.

To change the location the log file is written to:

- Click in the field where the current write location is to display the ellipsis button (...) to the right.
- Click on the ellipsis button to display the Browse for Folder window.
- Select the required folder to write the log file to.
- Click 0K to close the window.

Click Next to continue.

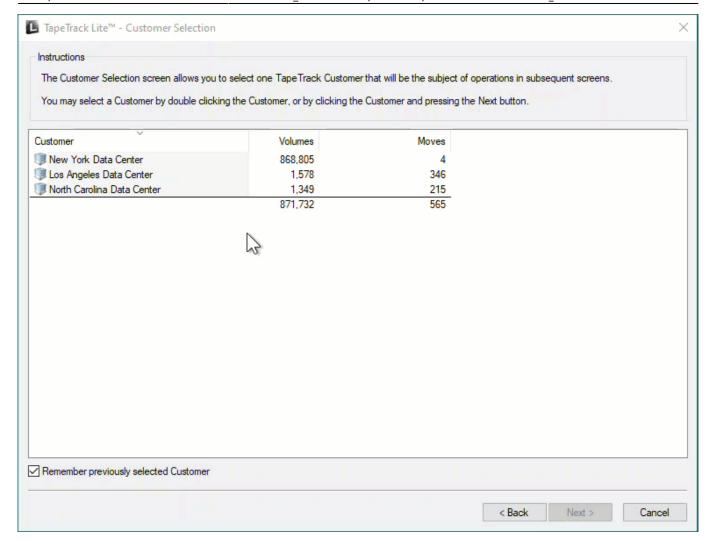

#### **Selecting a Customer**

If you only have access to one Customer-ID, the Customer will be automatically selected and this window will be skipped

From the **Customer Selection** window select a Customer that the new Volume/s are to be added to by double-clicking a Customer or selecting a Customer and clicking Next.

## **Selecting Media Type**

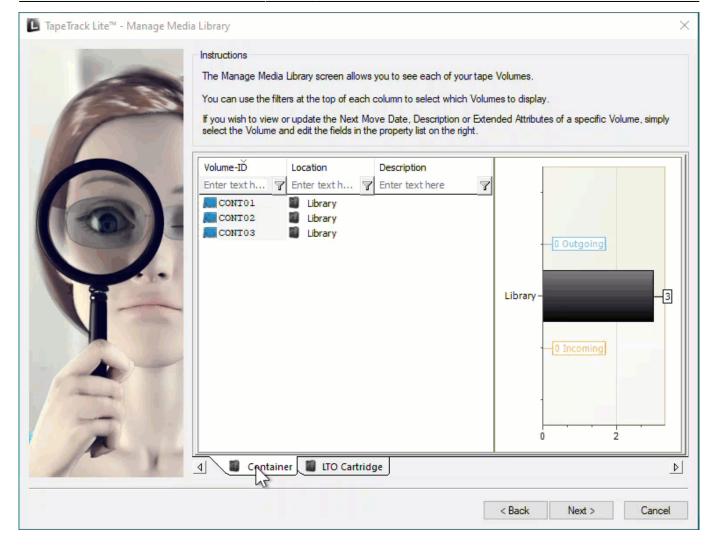

If you only have access to one Media-ID, there will only be one tab.

If you have more than one Media Type, select the required Media Type from the tabs at the bottom of the **Manage Media Library** window.

#### **Open Scan Window**

Right click anywhere in the window where the Volumes are listed to open the menu options. Select Scan > To Add to open the Scan In window.

#### **Scan-In Volumes**

Scan in your new Volumes into the **Scan-In** window using a your preferred scanning method

When all new Volumes have been scanned close the **Scan-in** window by clicking X in the top right corner.

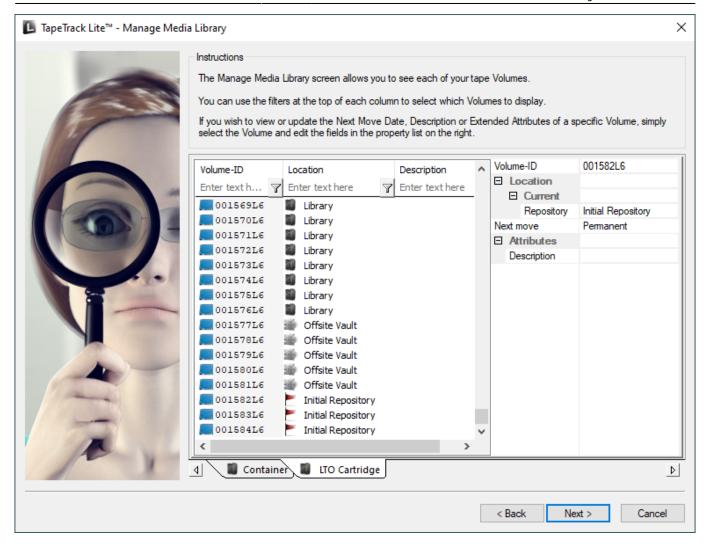

Your new volumes will now show in the Volume List.

If you have a default Repository (set in TapeMaster) the new Volumes will be assigned to that Repository. If no default Repository has been set the new Volumes will be assigned to the Initial Repository.

To move the Volumes, after exiting the Volume Management process, see Move Volumes.
