

Technical Note: Cannot update slot to zero

If a [Volume](#) is moving to a [Repository](#) that has slotting enabled, before the Volume can be [Confirmed](#), the Volume must have a slot assigned.

If the slot is zero at the time the Volume is being confirmed, the following message will be displayed:

This error message may occur if a product like TapeTrack Checkpoint is working with a cache of Volume information that was loaded before [Slot Allocation](#) was run.
