2025/12/01 09:57 1/1 Cannot update slot to zero

Technical Note: Cannot update slot to zero

If a Volume is moving to a Repository that has slotting enabled, before the Volume can be Confirmed, the Volume must have a slot assigned.

If the slot is zero at the time the Volume is being confirmed, the following message will be displayed:

This error message may occur if a product like TapeTrack Checkpoint is working with a cache of Volume information that was loaded before Slot Allocation was run.
