

Technical Note: Cannot update slot to zero

If a **Volume** is moving to a **Repository** that has **Slotting** enabled, before the **Volume** can be **Confirmed**, the **Volume** must have a Slot assigned.

If the **Slot** is zero at the time the **Volume** is being confirmed, the following message will be displayed:

 This error message may occur if a product like TapeTrack Checkpoint is working with a cache of **Volume** information that was loaded before **Slot Allocation** was run.
