

Running TapeTrack Utilities With Forms via Apache CGI

To facilitate running reports via Apache CGI, setting an argument FORM will display a form showing the available the available augments for the relevant utility report.

Prerequisites

- Apache 2.4 installed on Windows (example path: C:\Apache24)
- TapeTrack Server Utilities installed (example path:C:\Program Files\TapeTrack\TapeTrack Server Utilities\bin\tapetrack)
- Apache running as a Windows Service or console process
- [Apache http.conf configured](#) to run the executables.
