Clearing The Entire Database

Clearing the Database involves removing all data and restoring a blank database, equivalent to a fresh installation.

Clearing the entire Database will remove all information, including licensing details, connection data, Customer and Media information, User-ID's

Windows Instructions

If you wish to re-instate your current license after deleting the Database, export your license details before stopping the Server.

To make any alterations to the TapeTrack Database, stop the Server.

Make a backup of the TapeTrack\TapeTrack Framework Server\var directory and contents before making any alterations.

Navigate to the TapeTrack Database installation directory (default location = $C:\Pr$ Files\TapeTrack\TapeTrack Framework Server\var\db).

Delete all files in the var/db directory except DB_CONFIG

Restart the Server

Once TapeTrack TapeMaster is restarted, you will need to use the original User-ID tapemaster and blank password to login as all other User-ID's will no longer exist.
