

Technote: Removing Volume History

If you have been trialing TapeTrack, have all your Customers, Media Types and Inventory loaded, but would like to start production with all Volumes having a clear history without having to reload the data removing Volume Historical records is the best way to accomplish this.

Windows Instructions

To make any alterations to the TapeTrack Database, [stop the Server](#).

Make a backup of the var directory and contents before making any alterations.

Navigate to the TapeTrack Database installation directory (default location = C:\Program Files\TapeTrack\TapeTrack Framework Server\var\db).

Delete files TMSS10.history and TMSS10.history-archive.

This will remove all Volume Historical records, including when the Volume was added.

[Restart the Server](#) to have the server rebuild the deleted files.

Open TapeMaster to check the Volume History records have been removed.
