

lite Configuration File

To modify Lite, open TMSLite.cfg in a plain text editor such as Notepad. TMSLite.cfg can be found in the TapeTrack/Lite install directory (default C:\Program Files\TapeTrack\TapeTrack Lite).

Remove Slot Level Display

Locate the section **variables**

```
TMSSMaster.cfg - Notepad
File Edit Format View Help
options = {
  //
  // When exporting data to email send to the following addresses
  //
  email = [ "mailto1@tapetrack.com", "mailto2@tapetrack.com" ];

  /*
  variables = {
    TMSLEVELNAMES = "A,B,C";
  };
  */

  showparent = true;
};

defaults = {
```

Remove comment tags /* & */ from above and below variables.

Change the line of code
TMSLEVELNAMES = "A,B,C";
to
TMSNOLEVELSLOT = "true";

```
TMSSMaster.cfg - Notepad
File Edit Format View Help
options = {
  //
  // When exporting data to email send to the following addresses
  //
  email = [ "mailto1@tapetrack.com", "mailto2@tapetrack.com" ];

  variables = {
    TMSSNOLEVELSLOT = "true";
  };

  showparent = true;
};

defaults = {
```

and save file, making sure to save with the file extension .cfg and not .txt
