Lite Configuration File

To modify Lite, open `TMSSLite.cfg` in a plain text editor such as Notepad. TMSSLite.cfg can be found in the TapeTrack/Lite install directory (default `C:\Program Files\TapeTrack\TapeTrack Lite`).

Remove Slot Level Display

Locate the section **variables**

Remove comment tags /* & */ from above and below variables.

Change the line of code
TMSSLEVELNAMES = "A,B,C";
to
TMSSNOLEVELSLOT = "true";
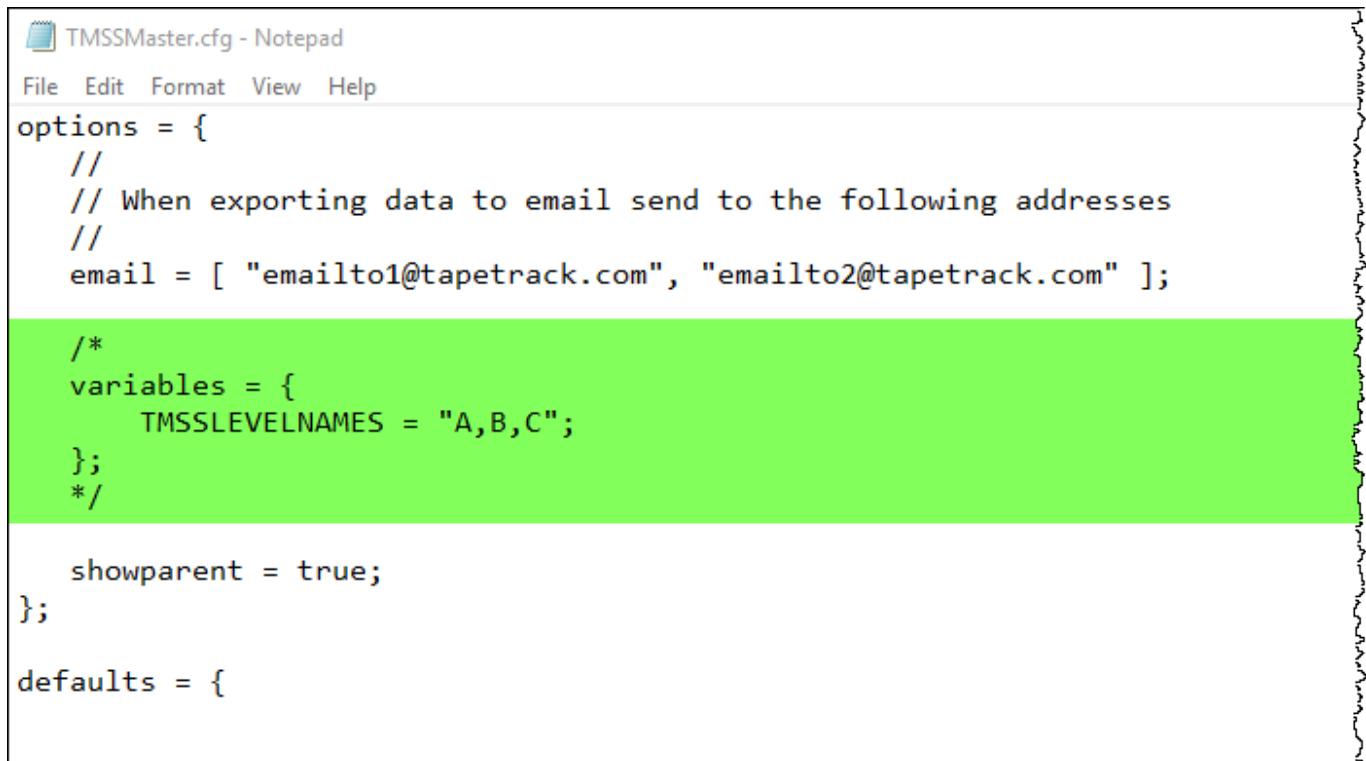

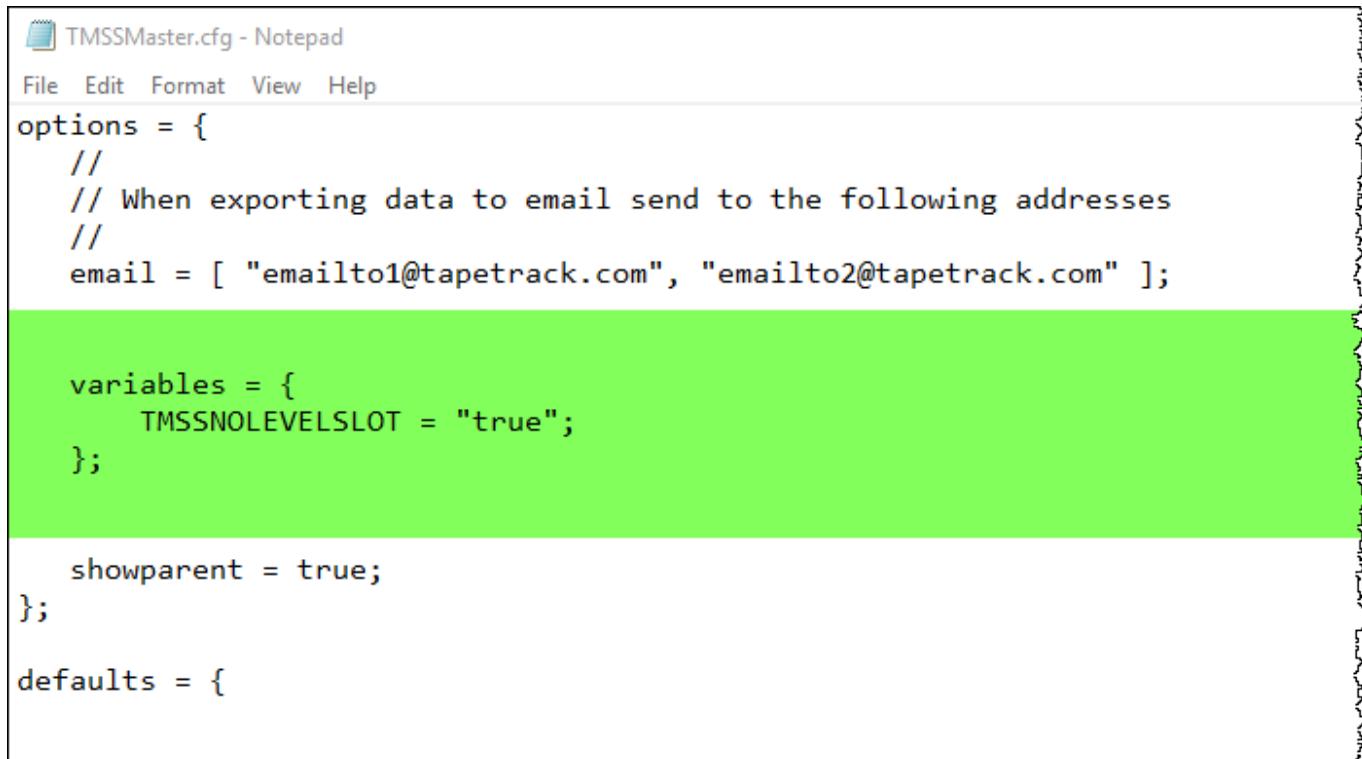

```
📄 TMSSMaster.cfg - Notepad

File  Edit  Format  View  Help

options = {
    //
    // When exporting data to email send to the following addresses
    //
    email = [ "emailto1@tapetrack.com", "emailto2@tapetrack.com" ];

    variables = {
        TMSSNOLEVELSLOT = "true";
    };

    showparent = true;
};

defaults = {
```

and save file.

⚠ Make sure that you have sufficient rights to save file to directory and to save as TMSS10Master.cfg and not as a text file or other file extension.

⚠ If when opening TapeTrack Lite you receive an error - **Failed to read configuration file (TMSSLite.cfg): Line( ) - Syntax error** check the configuration file that you have used plain ASCII quotes (" ") and not rich text quotes (" ") and that the replaced text is correct.
