

TapeMaster Configuration File

To modify TapeMaster, open TMSSMaster.cfg in a plain text editor such as Notepad. TMSSMaster.cfg can be found in the TapeTrack/TapeMaster install directory (default C:\Program Files\TapeTrack\TapeTrack TapeMaster).

The config file has comments throughout the code to either disable the execution of unused code blocks or add explanation to the available functions. *Block quotes look like /* */, anything between these characters are treated as comments and not code. Anything after the characters // are treated as comments and not code for that line.* **==== Remove Slot Level Display ==== Locate the section variables**

  };
  */

  showparent = true;
};

defaults = {
