

# Create Export File

Creates an export file of selected volumes, including the volumes history, to assist the support desk to diagnose volume movement discrepancies.

## Selecting Volumes For Export

Select all volumes by right clicking in the inventory window and select **Select→All**, or using shift+click and/or control+click select the range of volumes required.

## Exporting To File

Right click highlighted **volumes** and select **Special Operations → Support → Create Export File** and save file to required location.

## Sending File To The Helpdesk

Send the file to the [TapeTrack Helpdesk](#) with details regarding the issue you are currently experiencing.
