If the menu option **Framework Server Licensing** is greyed out and inaccessible, you do not have sufficient privileges (tapemaster rights) to alter the software license

Click Export license to a file to open the Windows file save dialog.

Save the file with a descriptive name (e.g. current_license.cfg) in a suitable location. Ensure that the file saves with a file extension .cfg as some operating systems may default to .txt

Click OK to close the TapeTrack License window if you are finished, or select other options to continue if required.
