Hiding Customers

Customers can be hidden, or removed from view, in TapeMaster, cleaning up the Customer Tree display without needing to delete old or unused Customer-ID's and their associated data.

Hiding Customers from display is a two part process:

- Setting the required Customer's Hide Customer Option to True.
- Removing the Hidden Customer from display via the TapeMaster Preferences.

Customer Properties Options

To Hide a Customer, in TapeMaster right click the required Customer-ID and select Properties.

Display Or Hide Customer From Customer Tree

Depending on TapeMaster Preferences, the Hidden Customer can be set to either be greyed out and inactive (not clickable) or completely removed from display. Having the Hidden Customer greyed out is the default installation setting, how your display functions will depend on what you have the preferences set to.

Show Hidden Customers = True

Show Volume Refresh Clock	False
Show Volume Health Score	True
	OK Cancel Help

Click anywhere in the Customer Tree to set focus and on your keyboard click F5 to update display.

Unhiding Customers

Unhiding Customers is essentially the same procedure to hiding Customers but in the reverse order.

If you can see the hidden Customers but in a greyed out format you can skip this step.
