

Desktop Login Options

Desktop Direct Login

Users can log directly into TapeTrack Desktop programs using a correct and active TapeTrack User-ID and Password.

To login directly you will need to [create a User](#) and password using the Group/User Administration window.

If a User attempts to login to TapeTrack with an incorrect password for more than five times consecutively, the User-ID will have access revoked. To [regain access you will need to reset the User-ID password](#).

Active Directory Login

Kerberos Single Sign on
