

Desktop Login Options

Desktop Direct Access

Users can log directly into TapeTrack Desktop programs using a correct and active TapeTrack User-ID and Password.

To login directly you will need to [create a User](#) and password using the Group/User Administration window.

If a User attempts to login to TapeTrack with an incorrect password for more than five times consecutively, the User-ID will have access revoked. To [regain access you will need to reset the User-ID password](#).

Active Directory Access

Active Directory access gives a User the ability to login using their Active Directory credentials.

For this function to be accessible the TapeTrack User-ID must match their Active Directory user name and the Active Domain details entered in their User-ID identity tab in the field AD Domain.

If the field Require AD Group is set to False the User may login using either their Active Domain credentials or using their TapeTrack User-ID and password. If the field Require AD Group is set to True the User can only login using their Active Domain credentials.
