2025/12/01 03:39 1/2 Editing The Registry

## **Editing The Registry**

Changes made to the Windows registry happen immediately, and no backup is automatically made. Do not edit the Windows registry unless you are qualified and confident about doing so.

Microsoft have issued the following warning with respect to the Registry Editor: "Using Registry Editor incorrectly can cause serious, system-wide problems that may require you to re-install Windows to correct them. Microsoft cannot guarantee that any problems resulting from the use of Registry Editor can be solved. Use this tool at your own risk."

## **Registry Backup**

Backup the registry before any making any modifications

Open regedit and create registry backup by right-clicking the top of the registry tree and selecting Export and saving to an appropriate location.
