The directory tapetrack/reports has been created to illustrate the report process. Set the directory structure on your computer to suit where you want to run and/or write the report to.

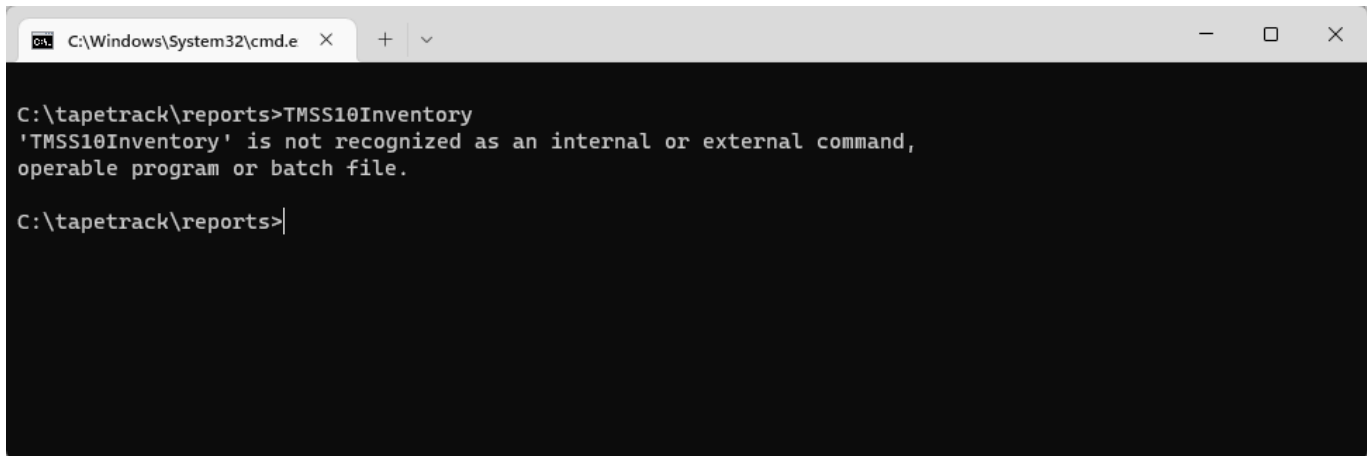

Methods to check:

Open a command prompt and run the command TMSS10Inventory, the output will show the utility options starting with TMSS10Inventory © GazillaByte 1998-2020 if Server Utilities have been installed.

Customize Columns

When outputting to PDF, as the report includes a lot of data, you may find columns overlap on the report.

The reason there is too many columns for the space available in a PDF format is because the report is customizable, the choice of which columns to include or discard is left to the client to decide rather than making the choice for you.

If all columns are required, outputting the report to text, CSV or EXCEL is advised.

Variable	Function
TMSSREPORTCOLUMNDELETE	Removes specified columns from the report
TMSSUNQUALIFIEDVOLUME	Removes Customer-ID and Media-ID, displaying unqualified barcode

```
set TMSSREPORTCOLUMNDELETE=1,5,8,9,10
set TMSSUNQUALIFIEDVOLUME=true
```
