

# Technote: Creating Reports

TapeTrack can produce reports two ways, through Desktop and Command Line programs.

## Desktop Programs

Reports can be created through the Desktop programs by selecting and filtering data and then exporting to a report.

This allows a quick and efficient creation of reports on demand.

Reports based over multiple Customer-ID's or Media-ID's can be produced through the Volume Global View function, of which results can be filtered down to required data and then exported to file.

When reporting on individual Media-ID's, the reports from the inventory window provide far more extensive options

## Command Line Programs

Reports that are required on a regular basis can be created using various command line programs that can then be saved to file, emailed and/or uploaded to the TapeTrack Server allowing clients to download without the need to create the reports themselves.

## Report Output Options

Both the Desktop and Command Line Programs can produce reports in the following formats:

- Text
- HTML
- PDF
- CSV

## Command Line Reports

Report	Description
<a href="#">Inventory Report</a>	Lists all Volumes in inventory that matches the supplied filters
<a href="#">Move List</a>	Lists all Volumes currently in a move from one Repository to another
<a href="#">Users List</a>	
<a href="#">Repositories</a>	Listing of all Repositories including capacity, usage, and number of moving Volumes
<a href="#">Zone List</a>	Format 1: Lists current zones, assigned Customer-ID, occupying Media type and Volume ID by slot number

Report	Description
	Format 2: Lists current zones, assigned Customer-ID, occupying Media type, assigned Repository-ID and Zone description
<a href="#">Storage History</a>	Lists daily Volume quantity in each repository including how many Volumes moved in and out of the repository
