

Technote: Creating Reports

TapeTrack can produce reports two ways, through Desktop and Command Line programs.

Report Output Options

Both the [Desktop](#) and [Command Line](#) Programs can produce reports in the following formats:

- Text
- HTML
- PDF
- CSV

Desktop Programs

Reports can be created through the Desktop programs by selecting and filtering data and then exporting to a report.

This allows a quick and efficient creation of reports on demand.

Reports based over multiple [Customer-ID's](#) or [Media-ID's](#) can be produced through the [Volume Global View](#) function, of which results can be filtered down to required data and then exported to file.

When reporting on individual [Media](#) types, the reports from the Inventory window provide more extensive options including:

- **Birthday:** [Volumes](#) birthday or creation date.
- **Expiry Date:** [Volumes](#) expiry date.
- **Last Audit Failure Time:** [Volumes](#) last audit failure.
- **Last Move Time:** [Volumes](#) last move date and time.
- **Last Sync:** [Volumes](#) last sync date and time.
- **Last Write Time:** [Volumes](#) last write date and time.
- **Last Update Time:** [Volumes](#) last update day and time.
- **Next Move:** [Volumes](#) next move date.
- **Generation Disbursement Table:** [Volumes](#) generation (e.g. LTO 4, LTO 5 etc) as well as scratch status.
- **Health Table**
- **History Rewind:** [Volume](#) location based on a date or range of dates.
- **History:** [Volume](#) history including location, date, movement, scan and user information.

Command Line Programs

Reports that are required on a regular basis can be created using various command line programs that can then be saved to file, emailed and/or uploaded to the TapeTrack Server allowing clients to download without the need to create the reports themselves.

Command Line Reports

Report	Description
Inventory Report	Lists all Volumes in Inventory that matches the supplied filters
Move List	Lists all Volumes currently in a move from one Repository to another
Users List	
Repositories	Listing of all Repositories including capacity, usage, and number of moving Volumes
Zone List	Lists current Zones, assigned Customer-ID , occupying Media type and Volume ID by Slot number
Storage History	Lists daily Volume quantity in each Repository including how many Volumes moved in and out of the Repository
