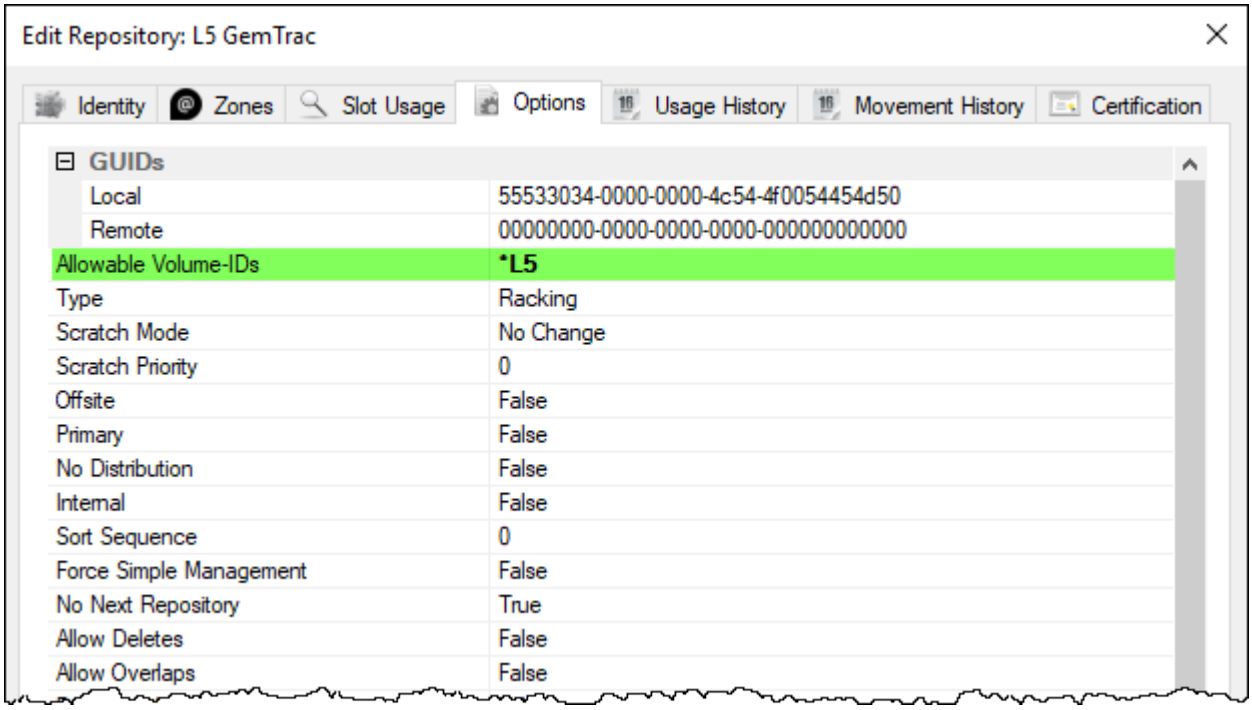
Restricting Which Volume-ID's Can Be Moved To A Repository.

TapeTrack allows the restriction of what volumes can be moved to a repository based on a pattern specified in the Repository properties.

Setting Volume-ID Restrictions

Open the required repository's properties and navigate to the `Options` tab.

Click in the field to the right of `Allowable Volume-ID's` and enter allowable volumes string pattern.



Restricting volume-ID patterns can be enforced using TapeTrack string filters.

Character filters may be used alone or in combination to achieve the restricted volume-ID pattern required

Example Patterns

Volume ID required	Filter Pattern	Example Volume-ID	
Only volumes ending in L5	*L5	100001L5	
Anything except volumes ending in L5	!*L5	100002L6	
Volumes ending in L5 or starting with X-	*(*L5	X-*)	X-2E8CA12F
