

# Restricting Which Volume-ID's Can Be Moved To A Repository.

TapeTrack allows the restriction of what volumes can be moved to a repository based on a pattern specified in the Repository properties.

## Setting Volume-ID Restrictions

Open the required repository's properties and navigate to the Options tab.

Click in the field to the right of Allowable Volume-ID's and enter allowable volumes string pattern.

Restricting volume-ID patterns can be enforced using [TapeTrack string filters](#).

Character filters may be used alone or in combination to achieve the restricted volume-ID pattern required.

### Example Patterns

Volume-ID required	Filter Pattern	Example Volume-ID
Only volumes ending in L5	*L5	100001L5
Any volumes except those ending in L5	!*L5	100002L6
Volumes ending in L5 or starting with X-	*(L5 X-*)	X-2E8CA12F

Any attempt to move a volume with a non compliant volume-ID will cause an error and the move will be aborted.

### Failed Operations

Error	Item	Time
Enter text here	Enter text here	Enter text here
 Disallowed Volume Serial. (see Media or Repository options)	000001L6	2018-06-21 12:39:06

Total Items 1
