

Scan To Slot Via Special Operations Slot Allocation

To use the Allocate to [Slot](#) via the Special Operations menu, the selected [Volumes](#) must be either moving to or confirmed in a [Repository](#) with allocated [Repository](#).

While this process can be used any number of [Volumes](#), you can only select a [Slot](#) for one [Volume](#) at a time so this process is best suited to one or low number of [Volumes](#). To [Slot](#) multiple [Volumes](#) more efficiently see [Scan to assign using Repository Usage Map](#).

Select Volumes To Slot

Select [Volumes](#) from the Inventory window by clicking on one [Volume](#) or using Shift+Click and Ctrl+Click to select a range of [Volumes](#).

The screenshot shows the TapeTrack TapeMaster™ (GazillaByte) software interface. The left pane displays a navigation tree for 'GazillaByte - Production' with nodes for 'US00 - United States C', 'US01 - New York D', 'US02 - Los Angeles', 'CONT - Container', 'LTO - LTO Cartr', and 'US03 - North Carol'. The right pane is divided into several sections: a top navigation bar with tabs for 'Inventory', 'DR Strategies', 'Data Clusters', 'Simple Management', 'Uploaded Files', and 'LTO Cartridge'; a 'Volumes' list table with columns for 'ID', 'Current Location', 'Target Location', 'Next Move', and 'Description'; a summary bar at the bottom of the table showing 'Total Items 1,604', 'Total Selected 2', and 'First Selection 7'; and a 'Repositories' section at the bottom with icons for 'Gemtrac', 'Library', and 'Offsite Vault'. A status bar at the bottom right indicates a secure connection: 'Connection 127.0.0.1 uses AES 256 bit encryption'.

ID	Current Location	Target Location	Next Move	Description

Select Slots

Right click highlighted **Volumes** and select **Special Operations > Slots > Allocate To Slot**

The [Slot](#) Selection window will display the [Current Repository](#) the [Volume](#) is being Slotted in and the [Volume-ID](#) currently being allocated in the top header. The main window will display [Slot](#) numbers, [Zones](#), [Slot Location](#), [Volume-ID](#) if [Slot](#) is occupied.

To allocate the current **Volume** to a **Slot**, click on an empty or unallocated **Slot** and then click **OK**. If you have only one **Volume** to Slot, the window will close. If you have multiple **Volumes** to Slot the window will refresh to show the next **Volume-ID** in the top header, following the same process for each **Volume**, select a **Slot** and press **OK**.

Refresh Display

Click in the Inventory window in TapeMaster and press F5 to update the display. The Scanned Volumes will now show in a move to the allocated Slots.
