

# Technical Note: Framework Server Command Line Arguments

The following command line arguments can be passed to the Framework Server executable:

| Argument | Type           | Notes   |
|----------|----------------|---|
| -f       | bool           | Run the program in foreground mode (Windows only)                               |
| -h       | string         | Path to the directory containing the TapeTrack database                         |
| -l       | integer        | Log file format (0=append, 1=truncate, 2=timestamp, 3=stdout/stderr)            |
| -L       | bool           | Reload the database   |
| -p       | integer/string | Port that TapeTrack will listen on. If string the services file will be checked |
| -S       | string         | Syslogd host in format host:port (default localhost:514)                        |
| -r       | bool           | Allow a one time login to the 'tapemaster' User-ID with a blank password        |
| -X       | bool           | Disable the replication sub-system  |
| -V       | bool           | Print version and exit  |
| -?       | bool           | Show help text  |
