# Set Volume Slot Manually

## Prerequisites

Target Repository must have an active Zone with vacant Slots available.

Volume must be in a move to, or currently at, the Repository into which it is to be Slotted.

## Setting Slot For Volumes In A Move To Or At Repository

Double click the required Volume to open the `Volume Properties` window.

Open the `Target Repository` tab.

Under `Virtual Location` click in the '"`Slot field and then click the … button to open the Slot Allocation window. Click on the required unallocated Slot and then click OK to assign the Volume to that slot.` Click Save '' on the Volume Properties window to save the Target Slot data.
