## **Setting Environmental Variables**

The default behaviour of TapeTrack programs can be changed by setting environmental variables.

These variables can be set using the following methods.

## **Windows Command Line**

set VARIABLE=VALUE

Where VARIABLE is the variable name, and VALUE is the variable value.

## **Linux Shell**

To set an environmental variable in the Linux operating system, use the export command.

export VARIABLE=VALUE

Where VARIABLE is the variable name, and VALUE is the variable value.
