Setting Environmental Variables

The default behaviour of TapeTrack programs can be changed by setting environmental variables.

These variables can be set using the following methods.

Windows Command Line

set VARIABLE=VALUE

Where VARIABLE is the variable name, and VALUE is the variable value.

Linux Shell

To set an environmental variable in the Linux operating system, use the export command.

export VARIABLE=VALUE

Where VARIABLE is the variable name, and VALUE is the variable value.

TapeTrack Config File
