Setting Environmental Variables

The default behaviour of TapeTrack programs can be changed by setting environmental variable.

These environmental variable can be set using the following methods.

Windows Command Line

```
set VARIABLE=VALUE
```

Where VARIABLE is the variable name, and VALUE is the variable value.

Linux Shell

To set an environmental variable in the Linux operating system, use the `export` command.

```
export VARIABLE=VALUE
```

Where VARIABLE is the variable name, and VALUE is the variable value.

You can also prepend the variable to the command.

```
TMSSREPORTFORMAT=CSV TMSS10Inventory
```

TapeTrack Config File

The TapeTrack Config File that is loaded when each Desktop and Command Line Program is initiated, it can also be used to set environmental variable.

```
variables = {
    TMSSLEVELNAMES = "A,B,C";
    TMSSNOLEVELSLOT = "1";
};
```
