# **Setting Environmental Variables**

The default behavior of TapeTrack programs can be changed by setting environmental variable.

These environmental variable can be set using the following methods.

#### **Windows Command Line**

set VARIABLE=VALUE

Where VARIABLE is the environmental variable name, and VALUE is the environmental variable value.

### **PowerShell**

To set an environmental variable in PowerShell, use the \$env: command.

\$env:TMSSREPORTFORMAT = "CSV"

Using a PowerShell variable \$TMSSREPORTFORMAT = "CSV" will not be interpreted as a Windows variable and, as such, will not be applied to the executable or output.

### **Linux Shell**

To set an environmental variable in the Linux operating system, use the export command.

export VARIABLE=VALUE

Where VARIABLE is the environmental variable name, and VALUE is the environmental variable value.

You can also prepend the environmental variable to the command.

TMSSREPORTFORMAT=CSV TMSS10Inventory

## TapeTrack Config File

The TapeTrack Config File that is loaded when each Desktop and Command Line Program is initiated, it can also be used to set environmental variable.

```
variables = {
    TMSSLEVELNAMES = "A,B,C";
    TMSSNOLEVELSLOT = "1";
};
```
