# **Upgrading Checkpoint**

Upgrading Checkpoint is a simple process that maintains your server connection and user details during the uninstallation of your current version and installation of the new release.

## **Download Installer**

- Checkpoint 64 Bit
- Checkpoint 32 Bit

# **Remove Current Installation**

The following instructions are the suggested method for Windows 10.

If you are running another operating system, please follow the instructions for that system.

- Open the Start menu.
- Click Settings (Gear icon).
- Click System on the Settings menu.
- Select Apps & features from the left pane to display a list of all installed apps.
- Select Checkpoint from the list by left clicking.
- Click the Uninstall button that appears.
- Click the Uninstall pop-up button to confirm.

## **Install New Release**

Locate the executable you downloaded, setup.exe, and double click to initiate the installation.
