Upgrading Checkpoint

Upgrading Checkpoint is a simple process that maintains your server connection and user details during the uninstallation of your current version and installation of the new release.

Download Installer

As some firewalls or security settings within your network may prohibit access to downloading the TapeTrack executable, it is always best to download the TapeTrack file before uninstalling your current version to maintain TapeTrack access.

Download Checkpoint:

- Checkpoint 64 Bit
- Checkpoint 32 Bit

Remove Current Installation

The following instructions are the suggested method for Windows 10.

If you are running another operating system, please follow the instructions for that system.

- Open the Start menu.
- Click Settings (Gear icon).
- Click System on the Settings menu.
- Select Apps & features from the left pane to display a list of all installed apps.
- Select Checkpoint from the list by left clicking.
- Click the Uninstall button that appears.
- Click the Uninstall pop-up button to confirm.

Install New Release

Locate the executable you downloaded, setup.exe, and double click to initiate the installation.
