Upgrading TapeMaster

Upgrading TapeMaster is a simple process that maintains your server connection and user details during the uninstallation of your current version and installation of the new release.

These instructions are for upgrading TapeMaster only, such as a stand alone install that accesses a Framework Server on a remote connection.

Download Installer

Before uninstalling the current version of TapeMaster you have installed, download the latest release of TapeMaster to ensure you have internet access and the ability to download the executable.

Download the TapeMaster executable:

- TapeMaster 64 Bit
- TapeMaster 32 Bit

Remove Current Installation

Ensure you have the system permissions required to install the new executable before uninstalling TapeMaster.

The following instructions are the suggested method for Windows 10.

If you are running another operating system, please follow the instructions for that system.

- Open the Start menu.
- Click Settings (Gear icon).
- Click Apps on the Settings menu.
- Select Apps & Features from the left pane to display a list of all installed apps.
- Scroll down and select TapeTrack TapeMaster from the list by left clicking.
- Click the Uninstall button that appears.
- Click the Uninstall pop-up button to confirm.

Install New Release

Locate the executable you downloaded, setup.exe, and double click to initiate the installation.
