

# Upgrade Server Utilities

Upgrading the Server Utilities is a simple process.

## Download Installer

- [Lite 64 Bit](#)
- [Lite 32 Bit](#)

## Remove Current Installation

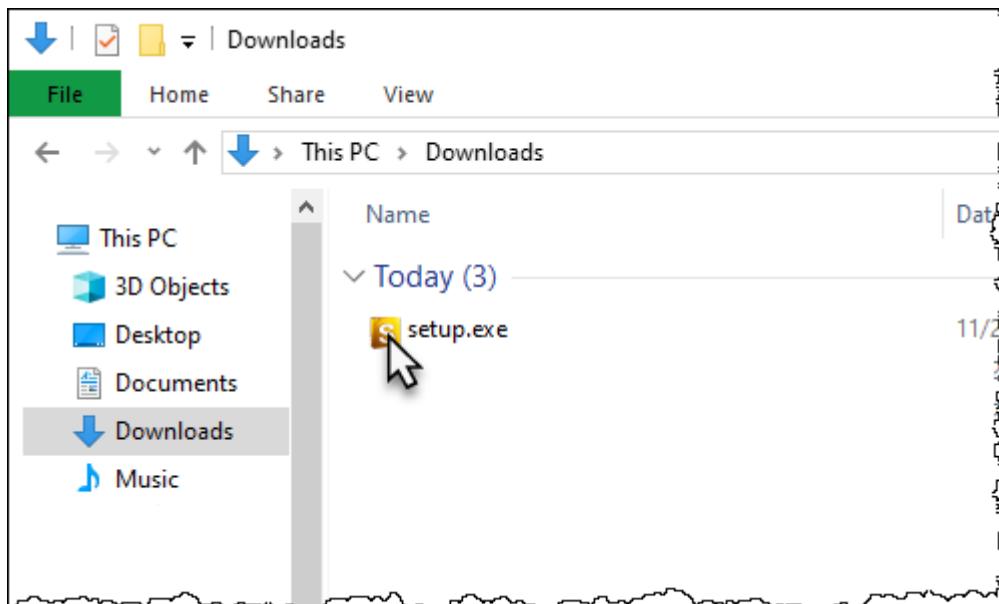

The following instructions are the suggested method for Windows 10.

If you are running another operating system, please follow the instructions for that system.

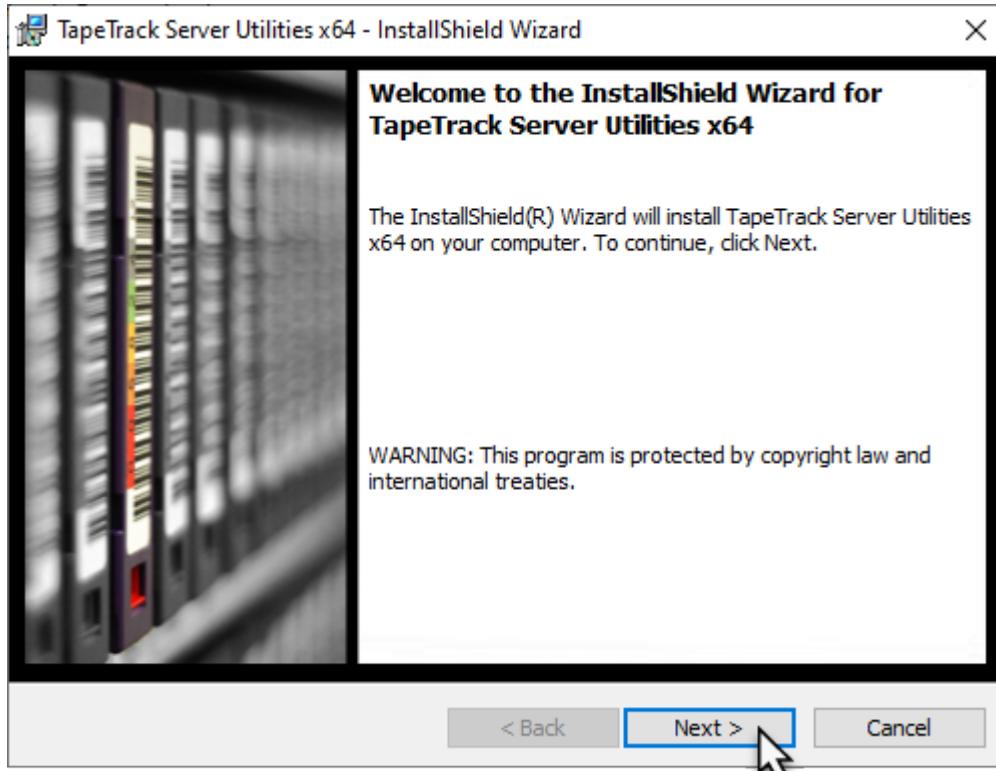

- Open the Start menu.
- Click Settings (Gear icon).
- Click System on the Settings menu.
- Select Apps & features from the left pane to display a list of all installed apps.
- Select TapeTrack Server Utilites from the list by left clicking.
- Click the Uninstall button that appears.
- Click the Uninstall pop-up button to confirm.

## Install New Release

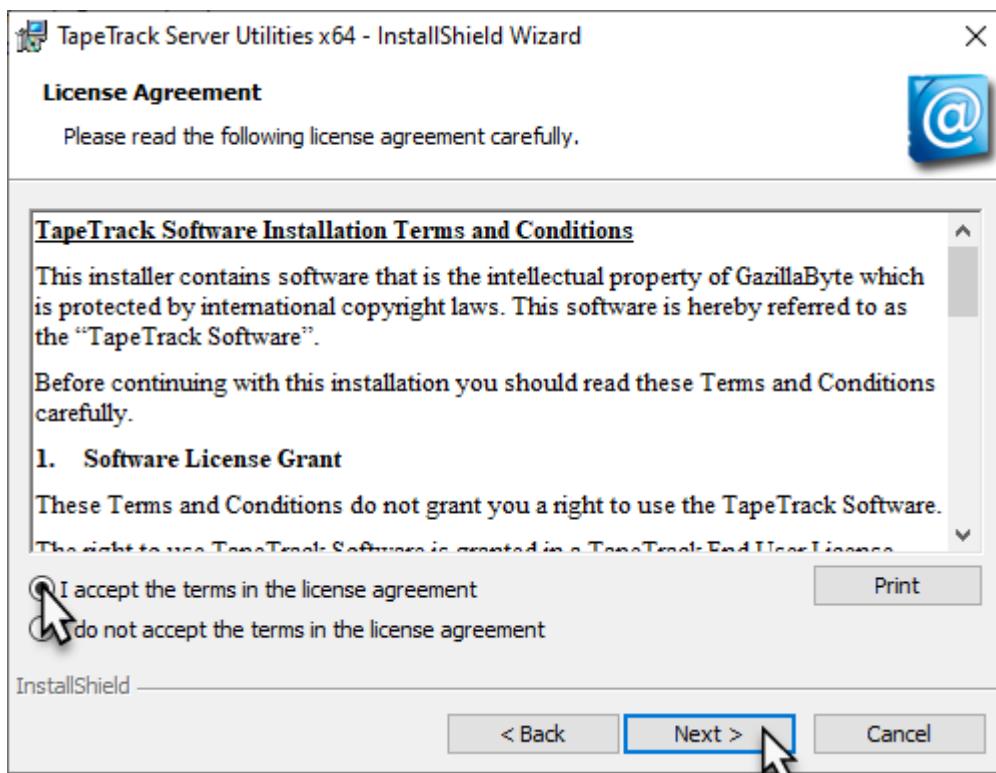

Locate the executable you downloaded, setup.exe, and double click to initiate the installation.

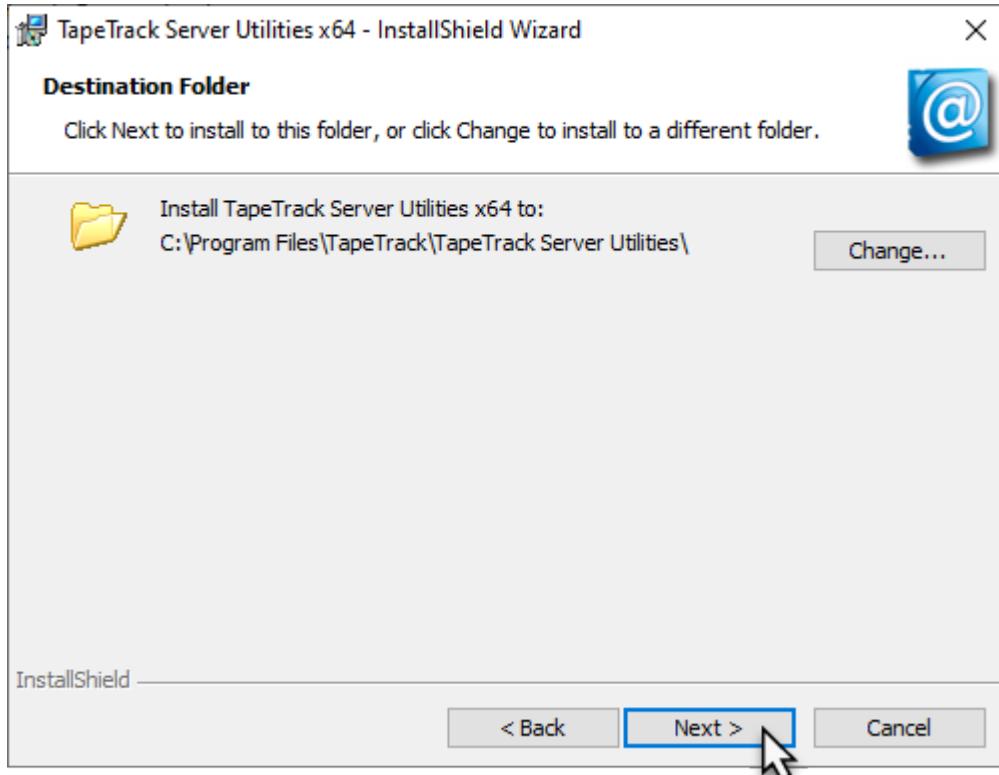

Click **Next >** to start the Install Shield Wizard.

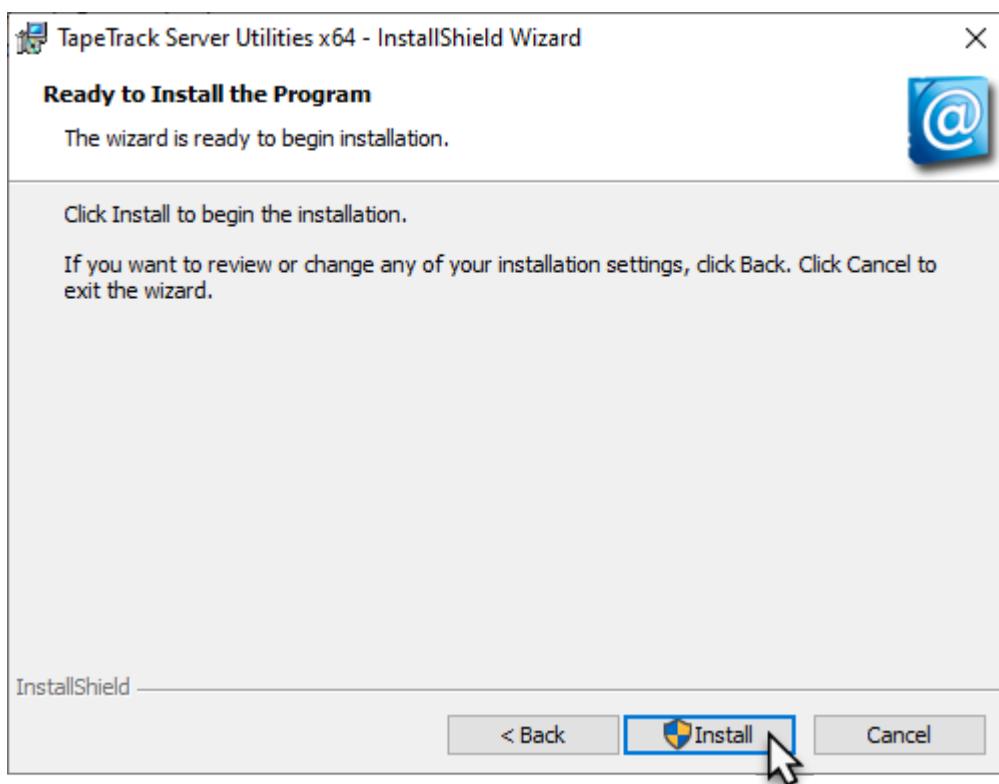

After reading and agreeing to the License Agreement click I accept the terms in the license agreement and Next > to proceed

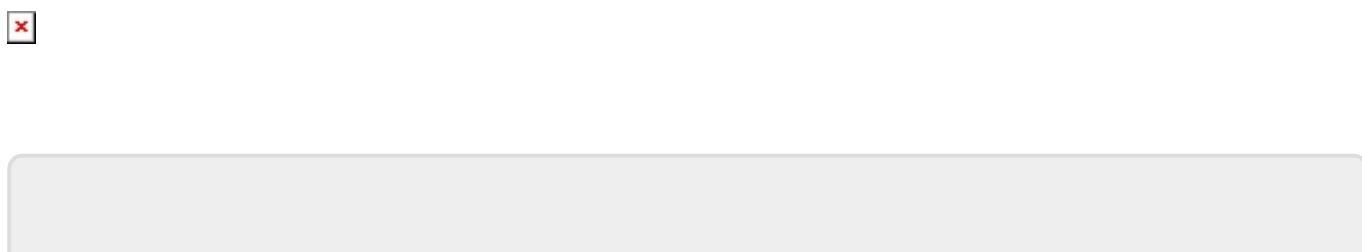

Confirm the installation directory is correct, or click Change to select another installation directory. Click Next > to proceed.

Click **Install** to begin the installation

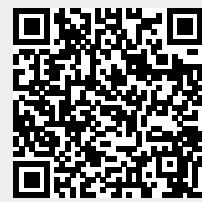

Click **Finish** to exit the installer.
