

Upgrading

There are many reasons to upgrade both hardware and software, unsupported releases, security updates or simply making use new features.

The process of performing an upgrade can be as simple as reinstallation of a software package all the way through to a complete hardware rebuild and a new operating system or migration from a physical server to the cloud.

Upgrading TapeTrack Client Software

Upgrading TapeTrack Client Software is a simple process of:

- Downloading the latest release executable
- Uninstalling the currently installed version
- Installing the latest release
